## 8970WUSS/8970WUSSB

## 8980WUSS/8980WUSSB

### User's Manual (concise)

# DUKANE

ENGLISH

Thank you for purchasing this product.

This product is supplied without a lens unit. You can select some optional lense units to meet your requirements.

This is the basic manual on the product. Visit our website to get the detailed manuals (**Safety Guide, Operating Guide, Network Guide, Instant Stack Guide**) and the latest information on the product.

Check them before using the product, for safe use and utilization of the product.

For our website, see the attached sheet.

#### **WARNING**

- ▶ Before using this product be sure to read all manuals for this product. After reading them, store them in a safe place for future reference.
- ▶ Heed all the warnings and cautions in the manuals or on the product.
- ▶ Follow all the instructions in the manuals or on the product.

**NOTE** • In this manual, unless any comments are accompanied, “the manuals” means all the documents provided with this product, and “the product” means this projector and all the accessories came with the projector.

## Graphical symbols explanation

The following entries and graphical symbols are used for the manuals and the product as follows, for safety purpose. Know their meanings beforehand and heed them.

**⚠ WARNING** This entry warns of a risk of serious personal injury or even death.

**⚠ CAUTION** This entry warns of a risk of personal injury or physical damage.

**NOTICE** This entry notices of fear of causing trouble.

WARNING/  
CAUTION

High  
pressure

High voltage

High  
temperature

Do not shade the light

Projector not for consumer use

Laser warning

RG2 caution

Kensington lock

Alternating  
current

Standby

On (Power)

Video input  
switching

## Important safety instructions

The followings are important instructions for safely using this product. Be sure to follow them always when handling the product. The manufacturer assumes no responsibility for any damage caused by mishandling that is beyond normal usage defined in these manuals of this projector.

### ⚠ WARNING

- ▶ Never use the product in or after an abnormality (for example, giving off smoke, smelling strange, finding a foreign object inside, broken, and so on.) If an abnormality should occur, unplug the projector urgently.
- ▶ Situate the product away from children and pets.
- ▶ Keep small parts away from children and pets. If swallowed, consult a physician immediately for emergency treatment.
- ▶ Do not use the product during electrical storms.
- ▶ Unplug the projector from the power outlet if the projector is not being used.
- ▶ Do not open or remove any portion of the product, unless the manuals direct it. For internal maintenance, leave it to your dealer or their service personnel.

*(continued on next page)*

**⚠ WARNING**

- ▶ Use only the accessories specified or recommended by the manufacturer.
- ▶ Do not modify the projector or accessories.
- ▶ Do not let any things or any liquids enter to the inside of the product.
- ▶ Do not get the product wet.
- ▶ Do not place the projector where any oils, such as cooking or machine oil, are used. Oil may harm the product, resulting in malfunction, or falling from the mounted position. Do not use adhesive such as threadlocker, lubricant and so on.
- ▶ Do not apply a shock or pressure to this product.
  - Do not place the product on an unstable place such as the uneven surface or the leaned table.
  - Ensure the product is stable. Place the projector so that it does not protrude from the surface where the projector is placed on.
  - Remove all the attachments including the power cord and cables, from the projector when carrying the projector.
- ▶ Do not look into the lens and the openings on the projector while the light source is on, since the projection ray may cause a trouble on your eyes.
- ▶ Do not approach the exhaust vents, while the light source is on. Also after the light source goes out, do not approach them for a while, since too hot.

**Note:** The Dukane models described in this document are manufactured by Maxell/Hitachi and use the same firmware, software programs, control code, and accessory parts. The equivalent Dukane to Maxell models are 8970WUSS (MP-WU8701W), 8970WUSSB (MP-WU8701B) [Black version], 8980WUSS (MP-WU8801W) and 8980WUSSB (MP-WU8801B) [Black version].

## Electro-magnetic interference

This is a Class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

This product may cause interference if used in residential areas. Such use must be avoided unless the user takes special measures to reduce electromagnetic emissions to prevent interference to the reception of radio and television broadcasts.

### **In Canada**

CAN ICES-3(A) / NMB-3(A).

### **In the US and places where the FCC regulations are applicable**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user is required to correct the interference at his own expense.

**INSTRUCTIONS TO USERS:** Some cables have to be used with the core set. Use the accessory cable or a designated type cable for the connection. For cables that have a core only at one end, connect the core to the projector.

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

# Laser precautions

## “No direct exposure to the beam shall be permitted”

As with any bright source, do not stare into the direct beam,  
RG2 IEC 62471-5:2015.

## Hazard distance

Refer to the table **T-1 in Supplement** (at the back of this manual). The table shows the hazard distance in which the beam strength described in IEC 62471 - 5 (Photobiological safety of lamps and lamp systems – Part 5: Image projectors) is categorized as RG3.

For the combination of the lens and projector for which a value is shown in the table, when the projection distance is the value or shorter the beam strength is categorized as RG3, and is a hazard.

When applying the combination shown in the table, “operators shall control access to the beam within the hazard distance or install the product at the height that will prevent exposures of spectators’ eyes within the hazard distance”.

Refer to the **F-8 in Supplement** (at the back of this manual).

## Laser aperture and Laser caution label

The positions of the laser aperture (⚠) and the laser caution label are shown in figure.

## Laser evaluation standard

IEC60825-1: 2007, IEC60825-1: 2014, EN60825-1: 2014

## Internal Laser Specifications

This product is equipped with 2 Laser Diodes.

### 1. 8980WUSS/8980WUSSB

Internal Laser 1 : 71W, Wave Length: 449 - 461nm

Internal Laser 2 : 95W, Wave Length: 449 - 461nm

### 2. 8970WUSS/8970WUSSB

Internal Laser 1 : 71W, Wave Length: 449 - 461nm

Internal Laser 2 : 71W, Wave Length: 449 - 461nm

**LASER ENERGY - EXPOSURE NEAR APERTURE MAY CAUSE BURNS**

(continued on next page)

### *Laser precautions (continued)*

- This projector is classified as a class 1 laser product that complies with IEC60825-1:2014 and JIS C 6802:2014, and as a class 3R laser product that complies with IEC60825-1:2007.  
Improper handling may cause injury. Be careful of the following.
- If an abnormality occurs in the projector, turn it off immediately, unplug the power cord from the outlet, and consult your dealer or service company. If you continue to use it, it may cause not only electric shock or fire but also vision disorder.
- Do not disassemble or modify the projector. The projector has a high-power laser device inside. It may cause serious injury.
- Do not look into the beam while projecting an image. Do not look into the lens through optical devices such as magnifiers or telescopes. It may cause vision disorder.
- Make sure that nobody is looking into the lens when you turn on the projector by remote control away from the projector.
- Do not let children operate the projector. If children could possibly operate the projector, they must be accompanied by an adult.
- Do not expose optical devices such as magnifiers or reflection mirrors to a projected image. It may cause bad effects on the human body if you continue to use it. It may also cause fire or accidents.
- Do not disassemble the projector when you dispose of it. Dispose of it according to laws and regulations of each country or region.

#### **CAUTION**

- Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

## Disposal of old equipment and batteries only for European Union and countries with recycling systems

The above mark is in compliance with the Waste Electrical and Electronic Equipment Directive 2012/19/EU (WEEE). The mark indicates the requirement NOT to dispose the equipment including any spent or discarded batteries as unsorted municipal waste, but use the return and collection systems available. If the batteries or accumulators included with this equipment display the chemical symbol Hg, Cd, or Pb, then it means that the battery has a heavy metal content of more than 0.0005% Mercury, or more than 0.002% Cadmium or more than, 0.004% Lead.

ENGLISH

**Note for the battery symbol (bottom symbol):** This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

## Contents of package

Your projector should come with the items shown below. Check that all the items are included. Contact your dealer immediately if any items are missing.

- (1) Remote control with two AA batteries
- (2) Power cord
- (3) Computer cable
- (4) Cable tie  
for power cord (x1)  
for HDMI™ cable (x3)
- (5) Terminal cover  
2 types
- (6) Lens hole cover
- (7) Information sheet  
\* This is the basic manual on the product.

- (8) Security label

### **⚠ WARNING**

► Keep small parts away from children and pets. Take care not to put in the mouth. If swallowed, consult a physician immediately for emergency treatment.

**NOTE** • Keep the original packing materials for future reshipment. Be sure to use the original packing materials when moving the projector. Remove the lens unit and attach the lens hole cover when moving the projector.

• This product does not include batteries for the internal clock. (📖 20)

## About the lens unit

This product is supplied without a lens unit. You can select some of the optional lens units to meet your requirements.

It is necessary to install the lens unit to operate this product. Prepare one or more lens units together with this product.

For more information, consult your dealer.

## Preparing for the remote control

Insert the batteries into the remote control before using it.

Use the appropriate AA carbon-zinc or alkaline batteries (non-rechargeable) in accordance with laws and regulations.

If the remote control starts to malfunction, try to replace the batteries. If you will not use the remote control for long period, remove the batteries from the remote control and store them in a safe place.

1. Remove the battery cover.
2. Align and insert the two AA batteries according to their plus and minus terminals as indicated in the remote control.
3. Put the battery cover back to the former state.

### **⚠ WARNING**

- Always handle the batteries with care and use them only as directed. Improper use may result in battery explosion, cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
  - When replacing the batteries, replace both of the batteries with new batteries of the same type. Do not use a new battery with a used battery.
  - Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
  - Make sure the plus and minus terminals are correctly aligned when loading a battery.
  - Keep a battery away from children and pets.
  - Do not recharge, short circuit, solder or disassemble a battery.
  - Do not place a battery in fire or water. Keep batteries in a dark, cool and dry place.
  - If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
  - Obey the local laws on disposing the battery.

# Arrangement

Refer to the table **T-2** in **Supplement** (at the back of this manual) to determine the screen size and projection distance. The values shown in the table are calculated for a full size screen.

This projector will perform in a free tilt angle, as shown in the figures below.

Horizontal 360°

Vertical 360°

Tilt 360°  
(combination of  
horizontal and vertical)

Secure a clearance of 30 cm or greater between the intake vents of the projector and other objects such as walls. There are intake vents on the left and right sides.

Intake vents

Secure a clearance of 50 cm or greater between the exhaust vents of the projector and other objects such as walls. There are exhaust vents on the back side.

Exhaust vents

When installing the projectors side by side, secure a clearance of 50 cm or greater between both projectors.

Assume that there is enough clearance in the front and top of the projector.

These also apply to the portrait mode installation.

(continued on next page)

### **WARNING**

- ▶ Install the projector where you can access the power outlet easily.
- ▶ Install the projector in a stable horizontal position.
  - Do not use any mounting accessories except the accessories specified by the manufacturer. Read and keep the manuals of the accessories used.
  - For special installation such as ceiling mounting, be sure to consult your dealer beforehand. Specific mounting accessories and services may be required.
  - Do not put the projector on its side, front or rear position. If the projector falls or is knocked over, it could cause injury and/or damage to the projector.
  - Do not attach nor place anything on the projector unless otherwise specified in the manual.
- ▶ Do not install the projector near thermally conductive or flammable things.
- ▶ Do not place the projector where any oils, such as cooking or machine oil, are used.
- ▶ Do not place the product in a place where it may get wet.

### **CAUTION**

- ▶ Place the projector in a cool place with sufficient ventilation.
  - Secure the specified clearance around the projector.
  - Do not stop up, block nor cover the projector's vent holes.
  - Do not place the product at places that are exposed to magnetic fields, doing so can cause the cooling fans inside the projector to malfunction.
  - When you use the projector with the air filter facing towards the ceiling, it is clogged more frequently. Clean the air filter periodically.
- ▶ Avoid placing the product in smoky, humid or dusty place.
  - Do not place the projector near humidifiers.

### **NOTICE**

- ▶ Position the product to prevent light from directly hitting the projector's remote sensor.
- ▶ Positional deviation or distortion of a projected image, or shift of the focus may occur due to ambient conditions, and so on. They tend to occur until the operation becomes stable, especially within about 30 minutes after the light source is turned on. Check and readjust them as necessary.
- ▶ Do not place the product in a place where radio interference may be caused. For details, see the **Operating Guide**. ( 1)

## Connecting with your devices

Before connecting the projector to a device, consult the manual of the device to confirm that the device is suitable for connecting with this product and prepare the required accessories, such as a cable in accord with the signal of the device. Consult your dealer when the required accessory did not come with the product or the accessory is damaged.

After making sure that the projector and the devices are turned off, perform the connection, according to the following instructions. Refer to figures **F-1** to **F-6** in **Supplement** (the end of this manual).

For details, see the **Operating Guide**. (📖1) Before connecting the projector to a network system, be sure to read the **Network Guide**. (📖1)

### ⚠️ **WARNING**

- ▶ Use only the appropriate accessories. Otherwise it could cause a fire or damage the projector and devices.
  - Use only the accessories specified or recommended by the projector's manufacturer. It may be regulated under some standards.
  - Neither disassemble nor modify the projector and the accessories.
  - Do not use the damaged accessory. Be careful not to damage the accessories. Route a cable so that it is neither stepped on nor pinched.

### ⚠️ **CAUTION**

- ▶ For a cable with a core at only one end, connect the end with the core to the projector. That may be required by EMI regulations.
- ▶ Before connecting the projector to a network system, be sure to obtain the consent of the administrator of the network.
- ▶ Do not connect the **LAN** port to any network that might have the excessive voltage.
- ▶ The designated USB wireless adapter that is sold as an option is required to use the wireless network function of this projector.
- ▶ Before you insert or pull out the USB wireless adapter from the projector, turn off the power of the projector and pull out the power cord's plug from the outlet. Do not touch the USB wireless adapter while the projector is receiving AC power.

**NOTE** • Do not turn on or off the projector while connected to a device in operation, unless that is directed in the manual of the device.

• Some input ports are selectable in the use. For details, see the **Operating Guide**.

(📖1)

• Be careful not to mistakenly connect a connector to a wrong port.

# Connecting to a power supply

1. Put the connector of the power cord into the **AC** (AC inlet) of the product.
2. Firmly plug the power cord's plug into the outlet. In a couple of seconds after the power supply connection, the **POWER** indicator lights up in steady orange. When the **DIRECT POWER ON** function is activated, the connection of the power supply make the projector turn on.  
When the **AUTO POWER ON** function is activated and the projector is receiving an input signal, it is turned on by connecting to the power supply.
3. Use the supplied cable tie (for power cord) to fasten the power cord.

Cable tie for power cord

ENGLISH

## ⚠ WARNING

- Use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
  - Do not touch the power cord with a wet hand.
  - Only use the power cord that came with the projector. If it is damaged, consult your dealer to get a new one. Never modify the power cord.
  - Only plug the power cord into an outlet whose voltage is matched to the power cord. The power outlet should be close to the projector and easily accessible. Remove the power cord for complete separation.
  - Do not distribute the power supply to multiple devices. Doing so may overload the outlet and connectors, loosen the connection, or result in fire, electric shock or other accidents.
  - Connect the ground terminal for the AC inlet of this unit to the ground terminal of the building using an appropriate power cord (bundled).

## NOTICE

- This product is also designed for IT power systems with a phase-to-phase voltage of 220 to 240 V.

## Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.
2. Make sure that the **POWER** indicator is steady orange. Then remove the lens cover.
3. Press the **STANDBY/ON** button on the projector or the **ON** button on the remote control.

The projection light source will light up, and the **POWER** indicator will begin blinking in green.

When the power is completely on, the indicator stops blinking and light in steady green.

### **WARNING**

- A strong light is emitted when the projector's power is on. Do not look into the lens of the projector or look inside of the projector through any of the projector's openings, since the projection ray may cause a trouble on your eyes.

**NOTE** • Power on the projector prior to any connected devices.

- The projector has the **DIRECT POWER ON** function, which makes the projector automatically turn on. For more information, see the **Operating Guide**. ( 1)

## Adjusting the projector's elevator

Lengthening or shortening the length of the elevator feet shifts the projection position and the projection angle.

Turn the elevator feet each to adjust their length.

### **⚠ WARNING**

- ▶ Do not lengthen the elevator feet exceeding 30 mm. The foot lengthened exceeding the limit may come off and drop the projector down, and result in an injury or damaging the projector.

## Adjusting the lens position

Press the **LENS SHIFT** button on the projector or the **SHIFT** button on the remote control to display the LENS SHIFT menu. Press the **▶** or **ENTER** button to select LENS SHIFT, then shift the lens with the **▲/▼/◀/▶** buttons.

### **⚠ CAUTION**

- ▶ Do not put your fingers or any other things around the lens. The moving lens could catch them in the space around the lens and result in an injury.

## Displaying the picture

1. Activate your signal source. Turn the signal source on, and make it send the signal to the projector.

2. Use the **VOLUME + / -** buttons to adjust the volume.

3. Press the button of the desirable input on the remote control.

When you press the **INPUT** button on the projector, selectable inputs are listed on the screen. You can use the cursor buttons to select the desirable input from the list.

4. Press the **ASPECT** button on the remote control. Each time you press the button, the projector switches the mode for aspect ratio in turn.

5. Use the **ZOOM +/-** buttons on the remote control to adjust the screen size.

You can also use **ZOOM** button on the projector. Use the cursor buttons after pressing the **ZOOM** button.

6. Use the **FOCUS +/-** buttons on the remote control to focus the picture.

You can also use the **FOCUS** button on the projector. Use the cursor buttons after pressing the **FOCUS** button.

Cursor buttons

**INPUT** button

**FOCUS** button

**ZOOM** button

Buttons for input ports

**FOCUS +/-** buttons

**ZOOM +/-** buttons

**ASPECT** button

**VOLUME +/-** buttons

### ⚠ WARNING

► If you wish to have a blank screen while the light source is on, use the **BLANK** function (see the **Operating Guide** (1)). Taking any other action may cause the damage on the projector. Blocking the beam by something causes high temperature and could result in fire or smoke.

**NOTE** • The **ASPECT** button does not work when no proper signal is input.  
• There may be some noise and/or the screen may flicker for a moment when an operation is made. This is not a malfunction.  
• For the details of how to adjust the picture, see **Operating Guide**. (1)

## Turning off the power

1. Press the **STANDBY/ON** button on the projector or the **STANDBY** button on the remote control.

The message “Power off?” appears on the screen for about 5 seconds.

2. Press the **STANDBY/ON** or **STANDBY** button again while the message appears.

The light source will go off, and the **POWER** indicator will begin blinking in orange.

Then the **POWER** indicator will stop blinking and light in steady orange when the light source cooling is completed.

3. Attach the lens cover, after the **POWER** indicator turns to steady orange.

### **WARNING**

- ▶ Do not touch around the exhaust vents during use or just after use, since they are too hot.
- ▶ Remove the power cord for complete separation.  
The power outlet should be close to the projector and easily accessible.

**NOTE** • Power off the projector after any connected devices are powered off.

- This projector has the AUTO POWER OFF function that can make the projector turn off automatically. For more information, see the **Operating Guide**. (1)

## Cleaning and replacing the air filter

Check and clean the air filter periodically. When the indicators or a message prompts you to clean the air filter, comply with it as soon as possible.

1. Turn the projector off, and unplug the power cord. Allow the projector to sufficiently cool down.
2. Use a vacuum cleaner on and around the filter cover.
3. Pick and pull up the filter cover knobs to take it off.
4. Press up slightly the bottom side knobs to unlock the bottom side of the air filter, and take it off.
5. The air filter consists of two parts.
  - Press down around the interlocking parts to unlock, then separate the two parts.
  - Use a vacuum cleaner for both sides of the air filter.
  - If the air filter is damaged or heavily soiled, replace it with the new one. Request for an air filter with the following type number from your dealer when purchasing a new one.  
Type number: **UX43481**
6. Use a vacuum cleaner for the filter vent of the projector.
7. Put back the air filter and filter cover into their place.
8. Turn the projector on and reset the filter time using the **FILTER TIME** item in the **EASY MENU**.
  - (1) Press the **MENU** button to display a menu.
  - (2) Point at the **FILTER TIME** using the **▲/▼** buttons, then press the **►** button. A dialog will appear.
  - (3) Press the **►** button to select "OK" on the dialog. It performs resetting the filter time.

(continued on next page)

**⚠ WARNING**

- ▶ Before taking care of the air filter, make sure the power cord is not plugged in, then allow the projector to cool sufficiently.
- ▶ Use only the air filter of the specified type. Do not use the projector without the air filter or the filter cover. It could result in a fire or malfunction to the projector.
- ▶ Clean the air filter periodically. If the air filter becomes clogged by dust and so on, internal temperatures rise and could cause a fire, a burn or malfunction to the projector.

**NOTE** • Reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter.

- The projector may display the message such as the “CHECK THE AIR FLOW” or turn off the projector, to prevent the internal heat level rising.

# Inserting or replacing the internal clock battery

This product has an internal clock. The battery for the internal clock is not contained at the time of factory shipment. When you use the function that requires the internal clock (📅"Event Scheduling" in the **Network Guide**), install a new battery according to the following procedure.

Use the following type of battery.

MAXELL, Part No. CR2032 or CR2032H

1. Turn the projector off, and unplug the power cord.  
■ Allow the projector to cool sufficiently.
2. Turn the battery cover fully counterclockwise using a coin or the like, and pick the cover up to remove it.
3. Pry up the old battery using a flathead screwdriver or the like to take it out. Do not use any metal tools. While prying it up, put a finger lightly on the battery since it may pop out of the holder.
4. Insert the new battery or replace the battery with a new one.  
Slide the battery in under the plastic claw, and push it into the holder until it clicks.
5. Place the battery cover in place, then turn it clockwise using such as coins to fix.

## ⚠ WARNING

- ▶ Always handle the batteries with care and use them only as directed. The battery may explode if mistreated. Do not recharge, disassemble or dispose of using fire. Improper use may result in cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment
- Be sure to use only the batteries specified.
- Make sure the plus and minus terminals are correctly aligned when loading a battery.
- Keep a battery away from children and pets. If swallowed, consult a physician immediately for emergency treatment.
- Do not short circuit or solder a battery.
- Do not place a battery in fire or water. Keep batteries in a dark, cool and dry place.
- If you observe battery leakage, wipe out the leakage and then replace a battery. If the leakage adheres to your body or clothes, rinse well with water immediately.
- Obey the local laws on disposing a battery.

### Manufacturing year and month

The manufacturing year and month of this projector is indicated as follows in the serial number of the rating label on the projector.

#### Example:

**F 9 C x 0 0 0 0 1**

└─ Manufacturing month: A = January, B = February, ... L = December.

## End user license agreement for the product software

Software in the product consists of the plural number of independent software modules and there exist our copyright and/or third party copyrights for each of such software modules. The product also uses software modules that we have developed and/or produced. And there exist our copyright and intellectual property for each of such software and related items including but not limited to the software related documents.

These rights above are protected by copyright law and other applicable laws. And the product uses software modules licensed as Freeware upon GNU GENERAL PUBLIC LICENSE Version 2 and GNU LESSER GENERAL PUBLIC LICENSE Version 2.1 established by Free Software Foundation, Inc. (U.S.) or license agreements for each software.

Check our website for license agreements for such software modules and other software. (📖1)

Contact dealer in your region for inquiry regarding licensed software. Refer to **License agreement of each software in Supplement** (the end of this manual) and license agreements of each software on the web page for detail of the license conditions and so on. (The original in English is carried since the license agreement is established by third party other than us.)

Because the program (the software module) is licensed free of charge, the program is provided "as is" without warranty of any kind, either expressed or implied, to the extent permitted by applicable law. And we do not take any responsibility or compensate for loss of any kind (including but not limited to loss of data, loss of accuracy or loss of compatibility with interface between other programs) by the software concerned and/or use of the software concerned to the extent permitted by applicable law.

## Troubleshooting - Warranty and after-service

If an abnormal operation (such as smoke, strange odor or excessive sound) should occur, stop using the projector immediately.

Otherwise if a problem occurs with the projector, first refer to “Troubleshooting” of the **Operating Guide**, **Network Guide** and **Instant Start Guide**, and follow the suggested checks. (📖 1)

If this does not resolve the problem, consult your dealer or service company. They tell you what warranty condition is applied.

Check our website where you may find the latest information for this product. (📖 1)

**NOTE** • The information in this manual is subject to change without notice.

- The illustrations shown in this manual are example only. Your projector may differ from the illustrations.
- The manufacturer assumes no responsibility for any errors that may appear in this manual.
- The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

### ENGLISH

#### PERMANENT/TEMPORARY BLINDNESS HAZARD!

Operators must control access to the beam within the hazard distance or install the product at the height that prevents exposure of spectators' eyes within the hazard distance. The hazard zone must be no lower than 3.0 meters above the floor and the horizontal clearance to the hazard zone must be a minimum 2.5 meters.

The following diagram shows the zones for ocular and skin hazard distances:

- A—Hazard zone. The region of space where the projection light from the laser-illuminated projector is above emission limits for Risk Group 2. The light intensity may cause eye damage after a momentary or brief exposure (before a person can avert his or her eyes away from the light source). The light may cause skin burns to occur.
- B—Hazard distance. Operators must control access to the beam within the hazard distance or install the product preventing potential exposure of the spectators' eyes from being in the hazard distance.
- C—No access zone. Horizontal clearance of the no access zone must be a minimum of 2.5 meters.
- D—Vertical distance to hazard zone. The hazard zone must be no lower than 3.0 meters above the floor.
- E—Represents the top view of the projector.
- F—Represents the side view of the projector.

## FRANÇAIS

### RISQUE DE CÉCITÉ TEMPORAIRE/PERMANENTE !

Les opérateurs doivent contrôler l'accès au faisceau dans la distance de risque ou installer l'appareil à une hauteur qui empêche l'exposition des yeux des spectateurs dans la distance de risque. La zone de danger ne doit pas se trouver à moins de 3 mètres au-dessus du niveau du sol et le dégagement horizontal par rapport à la zone de danger doit être, au minimum, de 2,5 mètres.

Le schéma suivant présente les distances critiques pour les yeux et la peau :

- A—Zone de danger. Région de l'espace dans laquelle la lumière de projection émise par le projecteur à illumination laser est supérieure aux limites d'émission définies pour le groupe de risque 2. L'intensité lumineuse peut provoquer des affections oculaires après une exposition brève ou momentanée (avant que la personne puisse détourner son regard de la source lumineuse). La lumière peut également provoquer des brûlures cutanées.
- B—Distance de risque. Les opérateurs doivent contrôler l'accès au faisceau dans la distance de risque ou installer l'appareil de manière à empêcher l'exposition des yeux des spectateurs dans la distance de risque.
- C—Zone d'accès interdit. Le dégagement horizontal de cette zone doit être, au minimum, de 2,5 mètres.
- D—Distance verticale par rapport à la zone de danger. La zone de danger ne doit pas se trouver à moins de 3 mètres au-dessus du niveau du sol.
- E—Représente la vue de dessus du projecteur.
- F—Représente la vue latérale du projecteur.

## DEUTSCH

### GEFAHR DAUERHAFTER/VORÜBERGEHENDER ERBLINDUNG!

Der Bediener muss den Zugang zum Lichtstrahl innerhalb des Gefahrenabstands beschränken oder das Produkt in einer Höhe installieren, die verhindert, dass die Augen der Zuschauer innerhalb des Gefahrenabstands dem Lichtstrahl ausgesetzt werden. Die Gefahrenzone darf nicht niedriger als 3,0 Meter über dem Boden liegen, und der horizontale Abstand zur Gefahrenzone muss mindestens 2,5 Meter betragen.

Dem nachstehenden Schaubild sind die Zonen der Gefahrenabstände für Augen und Haut zu entnehmen:

- A — Gefahrenzone. Der Bereich des Raumes, in dem das projizierte Licht des Projektors mit Laserausleuchtung über den Emissionsgrenzwerten für Risikogruppe 2 liegt. Die Lichtintensität kann nach flüchtiger oder kurzzeitiger Exposition (bevor eine Person ihre Augen von der Lichtquelle abwenden kann) Augenschäden verursachen. Das Licht kann Hautverbrennungen verursachen.
- B — Gefahrenabstand. Der Bediener muss den Zugang zum Lichtstrahl innerhalb des Gefahrenabstands beschränken oder das Produkt so installieren, dass eine potenzielle Exposition der Augen der Zuschauer innerhalb des Gefahrenabstands verhindert wird.
- C — Zugangsverbotszone. Der horizontale Abstand der Zugangsverbotszone muss mindestens 2,5 Meter betragen.
- D — Vertikale Distanz zur Gefahrenzone. Die Gefahrenzone darf nicht niedriger als 3,0 Meter über dem Boden liegen.
- E — Stellt die Draufsicht auf den Projektor dar.
- F — Stellt die Seitenansicht des Projektors dar.

## ESPAÑOL

### ¡PELIGRO DE CEGUERA TEMPORAL O PERMANENTE!

El operador deberá controlar el acceso al haz de luz en la distancia de riesgo o instalar el producto a una altura que impida la exposición de los ojos de los espectadores al haz de luz en dicha distancia. La zona de riesgo no debe encontrarse a menos de 3,0 metros por encima del suelo, y la separación horizontal de la zona de riesgo debe ser 2,5 metros como mínimo.

El diagrama siguiente muestra las distancias de riesgo aplicables a estos tipos de radiación, que afectan a los ojos y la piel:

- A—Zona de riesgo. El área espacial donde la luz de proyección del proyector con iluminación láser supera los límites de emisión del Grupo de riesgo 2. La intensidad de la luz puede causar daños oculares tras una exposición breve o momentánea (antes de que el individuo pueda retirar la vista de la fuente de luz). La luz podría causar quemaduras en la piel.
- B—Distancia de riesgo. El operador deberá controlar el acceso al haz de luz en la distancia de riesgo o instalar el producto de forma que impida la exposición potencial de los ojos de los espectadores al haz de luz en dicha distancia.
- C—Zona de acceso prohibido. La separación horizontal de la zona de acceso prohibido debe ser 2,5 metros como mínimo.
- D—Distancia vertical a zona de riesgo. La zona de riesgo no debe encontrarse a menos de 3,0 metros por encima del suelo.
- E—Representa la vista superior del proyector.
- F—Representa la vista lateral del proyector.

## ITALIANO

### RISCHIO DI CECITÀ PERMANENTE/TEMPORANEA

Gli operatori sono tenuti a controllare l'accesso al fascio luminoso nella distanza di rischio o ad installare il prodotto ad un'altezza che impedisca l'esposizione degli occhi degli spettatori entro la distanza di rischio. L'area di rischio non deve trovarsi al di sotto dei 3 metri di altezza dal pavimento e la distanza orizzontale dall'area di rischio deve essere di almeno 2,5 metri.

Il diagramma seguente mostra le aree di pericolo per occhi e pelle:

- A—Area di pericolo. La regione di spazio in cui la luminosità di proiezione del proiettore a laser supera i limiti di emissione per il Gruppo di rischio 2. L'intensità luminosa può causare danni agli occhi in seguito ad esposizione transitoria o breve (prima che una persona possa distogliere lo sguardo dalla sorgente luminosa). La luce può causare ustioni dell'epidermide.
- B—Distanza di pericolo. Gli operatori sono tenuti a controllare l'accesso al fascio luminoso entro la distanza di pericolo o ad installare il prodotto in modo da impedire la potenziale esposizione degli occhi degli spettatori entro la distanza di pericolo.
- C—Area ad accesso vietato. L'ingombro orizzontale dell'area ad accesso vietato deve essere di almeno 2,5 m.
- D—Distanza verticale dall'area di pericolo. L'area di pericolo deve trovarsi ad almeno 3 metri di altezza da terra.
- E—Rappresenta la vista dall'alto del proiettore.
- F—Rappresenta la vista laterale del proiettore.

## NORSK

### FARE FOR PERMANENT/MIDLERTIDIG BLINDHET!

Operatører må kontrollere tilgangen til strålen innenfor risiko-avstanden eller installere produktet i en høyde som hindrer eksponering av tilskuernes øyne innenfor risiko-avstanden. Risikosonen skal ikke være lavere enn 3,0 meter over gulvet, og den horisontale klaringen til risikosonen må være minimum 2,5 meter.

Følgende diagram viser sonene for risikoavstand til øyne og hud:

- A—Risikosone. Den delen av rommet der projeksjonslyset fra laserlysprojektoren er over utslippsgrensen for Risikogruppe 2. Lysintensiteten kan forårsake øyeskade etter en momentan eller kortvarig eksponering (det skjer før en person kan avverge skaden ved ta øynene bort fra laserlyskilden). Lyset kan forårsake hudforbrenninger.
- B—Risikoavstand. Operatører skal kontrollere tilgangen til strålen innenfor risiko-avstanden eller installere produktet slik at mulig eksponering av tilskueres øyne forhindres ved at tilskuerne ikke befinner seg innenfor risikoavstanden.
- C—Ingen tilgang-sone. Horisontal klaring for Ingen tilgang-sonen må være minimum 2,5 meter.
- D—Vertikal avstand til faresone. Faresonen må ikke være lavere enn 3,0 meter over gulvet.
- E—Representerer projektoren sett ovenfra.
- F—Representerer projektoren sett fra siden.

## NEDERLANDS

### GEVAAR VOOR TIJDELIJKE/PERMANENTE BLINDHEID!

De gebruikers moeten toegang tot het gevaarlijke bereik voor de lichtbundel verbieden, of het product op een geschikte hoogte installeren zodat de ogen van de toeschouwers niet kunnen worden blootgesteld aan de lichtbundel binnen het gevaarlijke bereik. De gevarenzone strekt zich uit tot niet lager dan 3,0 meter boven de vloer en de horizontale vrije ruimte tot aan de gevarenzone moet minimaal 2,5 meter zijn.

Het volgende diagram toont de afstanden voor de gevarenzones wat betreft schade aan de ogen en de huid:

- A—Gevarenzone. Ruimte waar het door de projector geproduceerde laserlicht boven de emissielimieten voor Risicogroep 2 valt. De intensiteit van het licht kan oogschade veroorzaken na slechts een ogenblik of een zeer korte blootstelling (voor iemand zijn of haar ogen kan afwenden van de lichtbron). Het licht kan ook brandwonden op de huid veroorzaken.
- B—Gevarenzone. De gebruikers moeten toegang tot het gevaarlijke bereik voor de lichtbundel verbieden, of het product zo installeren dat de ogen van de toeschouwers niet kunnen worden blootgesteld aan de lichtbundel binnen het gevaarlijke bereik.
- C—Verboden toegangszone. De horizontale vrije ruimte voor de zone waar toegang verboden is moet minimaal 2,5 meter bedragen.
- D— Verticale afstand tot gevarenzone. De gevarenzone mag niet lager zijn dan 3,0 meter boven de vloer.
- E—Geeft het bovenaanzicht van de projector weer.
- F—Geeft het zijaanzicht van de projector weer.

## PORTUGUÊS

### PERIGO DE CEGUEIRA PERMANENTE/TEMPORÁRIA!

Os operadores devem controlar o acesso ao feixe dentro da distância de perigo ou instalar o produto a uma altura que previna a exposição dos olhos dos telespectadores dentro da distância de perigo. A zona de perigo não deve ser inferior a 3,0 metros acima do chão e a distância horizontal até à zona de perigo deve ser de pelo menos 2,5 metros.

O seguinte diagrama mostra as zonas para as distâncias de perigo para os olhos e pele:

- A—Zona de perigo. A região de espaço onde a luz de projecção desde o projector iluminado por laser está acima dos limites de emissão para o Grupo de Risco 2. A intensidade da luz pode provocar danos aos olhos após uma exposição momentânea ou breve (antes que a pessoa possa desviar seus olhos da fonte de luz). A luz pode provocar queimaduras na pele.
- B—Distância de perigo. Os operadores devem controlar o acesso ao feixe dentro da distância de perigo ou instalar o produto para impedir a possível exposição dos olhos dos telespectadores dentro da distância de perigo.
- C—Zona sem acesso. A distância horizontal da zona sem acesso deve ser de pelo menos 2,5 metros.
- D—Distância vertical até à zona de perigo. A zona de perigo não deve ser inferior a 3,0 metros acima do chão.
- E—Representa a vista superior do projector.
- F—Representa a vista lateral do projector.

## 简体中文

### 永久性 / 暂时性致盲危险！

操作员必须将对光束的接触控制在危险距离内并将产品安装在可防止观察者眼睛在危险距离内接触光束的高度。危险区域在地板以上的距离不得低于 3.0 米，到危险区域的水平间隙不得小于 2.5 米。

下图显示了眼睛和皮肤危险距离的区域：

- A—危险区域。激光照明投影机的投影光超过危险等级 2 的辐射极限的空间区域。在短暂或短促的接触后，亮度可能会造成眼睛损伤（在人眼躲避光源之前）。光可能会造成皮肤灼伤。
- B—危险距离。操作员必须将对光束的接触控制在危险距离内，或将产品安装在可防止观察者眼睛在危险距离内接触光束的位置。
- C—无接触区域。无接触区域的水平间隙必须至少为 2.5 米。
- D—到危险区域的垂直距离。危险区域在地板以上的距离不得低于 3.0 米。
- E—表示投影机的俯视图。
- F—表示投影机的侧视图。

## 한국어

### 영구적 / 일시적 실명 위험 !

조작자는 위험 거리 내에서 광선에 대한 접근을 통제하거나 위험 거리 내에서 관중의 눈에 노출되지 않도록 하는 높이에 제품을 설치해야 합니다. 위험 영역은 바닥 으로부터 3.0m 이상이어야 하며 위험 영역까지의 가로 간격은 최소 2.5m 여야 합니다.

다음 다이어그램에는 안구 및 피부 위험 거리에 대한 영역이 나와 있습니다 :

- A—위험 영역 레이저 조명 프로젝터의 영사 조명이 위험 그룹 2 에 대한 방출 제한을 초과하는 공간 영역. 조명 강도로 인해 순간 적이거나 짧은 노출 후에 눈에 대한 손상이 발생할 수 있습니다 ( 사람이 광원으로 부터 눈을 돌리기 전에 ). 조명 으로 인해 화상 이 발생할 수 있습니다 .
- B—위험 거리 . 조작자는 위험 거리 내에서 광선에 대한 접근을 통제하거나 관중의 눈이 위험 거리 내에 잠재적으로 노출되지 않도록 제품을 설치해야 합니다 .
- C—접근 불가 영역 . 접근 불가 영역의 가로 간격은 최소 2.5m 여야 합니다 .
- D—위험 영역까지의 수직 거리 . 위험 영역은 바닥 으로부터 3.0m 이상이어야 합니다 .
- E—프로젝터의 상단 보기를 나타냅니다 .
- F—프로젝터의 측면 보기를 나타냅니다 .

## SVENSKA

### RISK FÖR PERMANENT/TILLFÄLLIG BLINDHET!

Operatörer måste kontrollera tillgången till strålen inom riskavståndet eller installera produkten på en höjd som förhindrar att åskådares ögon utsätts för strålen inom riskavståndet. Riskområdet får inte vara lägre än 3,0 meter ovanför golvet och det horisontala avståndet till riskområdet måste vara minst 2,5 meter.

Följande diagram visar områdena för okulära och hud riskavstånd:

- A—Riskområde. Regionen för utrymmet inom vilket projicerat ljus från laserbelyst projektor överstiger gränserna för Riskgrupp 2. Ljusintensiteten kan orsaka ögonskada efter en tillfällig eller kort utsättning (innan en person kan vända bort hens ögon från ljuskällan). Ljuset kan orsaka brännskada på hud.
- B—Riskavstånd. Operatörer måste kontrollera tillgången till strålen inom riskavståndet eller installera produkten så att det förhindrar eventuell utsättning för att åskådares ögon utsätts för strålen inom riskavståndet.
- C—Tillträde förbjudet område. Horisontellt fritt avstånd till tillträde förbjudet området måste vara minst 2,5 meter.
- D—Vertikalt avstånd till riskområdet. Riskområdet får inte vara lägre än 3,0 meter ovanför golvet.
- E—Representerar projektorn sedd ovanifrån.
- F—Representerar projektorn sedd från sidan.

## РУССКИЙ

### ОПАСНОСТЬ ПОСТОЯННОГО/ВРЕМЕННОГО ОСЛЕПЛЕНИЯ!

Операторы должны следить, чтобы луч не попадал в глаза на опасном расстоянии, либо должны установить прибор на высоте, которое бы предотвращало попадание света в глаза на опасном расстоянии. Зона опасности должна быть не ниже 3,0 метров над уровнем пола, минимальное расстояние по горизонтали до зоны опасности должно быть не менее 2,5 метров.

На следующем графике показаны опасные зоны для глаз и кожи:

- А—Зона опасности. Зона в пространстве, в которой параметры проецируемого света из лазерного проектора превышают лимиты эмиссии, определенные для Группы риска 2. Интенсивный свет может вызвать повреждение глаз после моментального или кратковременного попадания света (до момента, когда человек успевает отвернуться от источника света). Свет может вызвать ожоги кожи.
- В—Опасное расстояние. Операторы должны контролировать доступ к лучу на опасном расстоянии или установить изделие таким образом, чтобы предупредить потенциальное воздействие света на органы зрения зрителей, возможное на опасном расстоянии.
- С—Зона без доступа. Минимальное карантинное расстояние по горизонтали до зоны без доступа должно быть не менее 2,5 метра.
- D—Вертикальное расстояние до опасной зоны. Зона опасности не должна быть ниже 3,0 метров над уровнем пола.
- Е—Представляет собой вид проектора сверху.
- F—Представляет собой вид проектора сбоку.

## SUOMI

### PYSYVÄN/ VÄLIAIKAISEN SOKEUTUMISEN VAARA!

Käyttäjien tulee kontrolloida pääsyä säteeseen vaaraetäisyysalueen sisäpuolella tai asentaa tuote sellaiselle korkeudelle, joka estää katsojan silmien altistumisen vaaraetäisyyden sisäpuolella. Vaara-alue ei saa olla matalampi kuin 3,0 metriä lattian yläpuolella, ja vaakasuoran etäisyyden vaara-alueeseen tulee olla vähintään 2,5 metriä.

Seuraava kaavakuva näyttää alueet silmien ja ihon vaurioitusvaaraetäisyyksille:

- A—Vaara-alue. Tila-alue, jossa laservaloistusta projektorista tuleva projisointisäde on Riskiryhmä 2:n päästörajojen yläpuolella. Valon voimakkuus saattaa aiheuttaa silmävamman hetkellisen tai lyhyen altistumisen jälkeen (ennen kuin henkilö ehtii siirtää katseensa pois valolähteestä). Valo saattaa aiheuttaa ihopalovammoja.
- B—Vaaraetäisyys. Käyttäjien tulee kontrolloida pääsyä säteeseen vaaraetäisyyden sisäpuolella tai asentaa tuote siten, että estetään katsojien silmien mahdollinen altistuminen vaaraetäisyydellä olemisen vuoksi.
- C—Ei pääsyä-alue. Vaakasuora etäisyys ei pääsyä-alueesta täytyy olla vähintään 2,5 metriä.
- D—Pystysuora etäisyys vaara-alueeseen. Vaara-alue ei saa olla matalammalla kuin 3,0 metriä lattiasta.
- E—Esittää näkymää projektorin päältä.
- F—Esittää näkymää projektorin sivulta.

## POLSKI

### ZAGROŻENIE TRWAŁĄ/PRZEJŚCIOWĄ UTRATĄ WZROKU!

Operatorzy muszą kontrolować dostęp do wiązki w odległości stanowiącej zagrożenie lub instalować produkt na wysokości uniemożliwiającej narażenie oczu widzów w odległości stanowiącej zagrożenie. Strefa zagrożenia musi znajdować się nie niżej niż 3,0 m nad podłogą, a strefa niedostępna musi być rozszerzona w poziomie o co najmniej 2,5 m od granicy strefy zagrożenia.

Poniższy diagram przedstawia strefy odległości zagrożenia urazami oczu i skóry:

- A — Strefa zagrożenia. Strefa, w której natężenie światła z projektora laserowego przekracza limity emisji dla grupy ryzyka 2. Natężenie światła może spowodować uszkodzenie oczu po chwilowym lub krótkotrwałym narażeniu (zanim osoba będzie w stanie odwrócić wzrok od źródła światła). Światło może spowodować oparzenia skóry.
- B — Odległość zagrożenia. Operatorzy muszą kontrolować dostęp do wiązki światła w odległości niebezpiecznej lub zainstalować urządzenie w sposób zapobiegający potencjalnemu narażeniu oczu widzów w odległości niebezpiecznej.
- C — Strefa niedostępna Strefa niedostępna musi być rozszerzona w poziomie o co najmniej 2,5 m od granicy strefy zagrożenia.
- D—Odległość od strefy zagrożenia w pionie. Strefa zagrożenia musi znajdować się nie niżej niż 3,0 m nad podłogą.
- E — Widok projektora z góry.
- F — Widok projektora z boku.

## TÜRK

### KALICI/GEÇİCİ KÖRLÜK TEHLİKESİ!

Operatörler mutlaka tehlike mesafesindeki huzme erişimini kontrol etmeli veya ürünü, izleyicilerin gözlerinin tehlike mesafesinde kalmayacağı bir yüksekliğe monte etmelidir. Tehlike bölgesi, zeminden en az 3,0 metre yükseklikte olmalı ve tehlike bölgesine yatay mesafe minimum 2,5 metre olmalıdır.

Aşağıdaki şemada göz ve cilt tehlike mesafelerine karşılık gelen bölgeler açıklanmıştır:

- A—Tehlike bölgesi. Lazerle çalışan projektörlerden gelen projektör ışığının, Risk Grubu 2 emisyon sınırlarının üzerinde olduğu bölgedir. Işık yoğunluğu anlık veya kısa süreli bir maruziyet sonrası (kişi, gözlerini ışık kaynağından kaçırana kadar geçen sürede) göz hasarına neden olabilir. Işık, cilt yanıklarının meydana gelmesine neden olabilir.
- B—Tehlike mesafesi. Operatörler mutlaka tehlike mesafesindeki huzme erişimini kontrol etmeli veya ürünü, izleyicilerin gözlerinin tehlike mesafesinde kalmayacağı şekilde monte etmelidir.
- C—Erişilmesi yasak bölge. Erişilmesi yasak bölgenin yatay mesafesi mutlaka en az 2,5 metre olmalıdır.
- D—Tehlike bölgesine düşey mesafe. Tehlike bölgesi mutlaka zeminden en az 3,0 metre yükseklikte olmalıdır.
- E—Projektörün üstten görünümünü temsil eder.
- F—Projektörün yandan görünümünü temsil eder.

## 繁體中文

### 永久性 / 暫時性致盲危險！

操作人員必須控制對危險距離內光束的接觸，或將產品安裝於可防止觀察者的眼睛在危險距離內暴露於光照之下的高度。危險區域與地面相距不得低於 3.0 公尺，且與危險區域的水平間隙至少須為 2.5 公尺。

下圖針對眼睛與皮膚危險距離顯示了各個區域：

- A—危險區域。投影光線從雷射燈源投影機射出的空間區超過風險等級 2 的輻射上限。在短暫暴露之下 ( 在人員可以使其眼睛避開光源之前 )，光強可能會導致視力損傷。光線可能會導致皮膚灼燒。
- B—危險距離。操作人員必須控制對危險距離內光束的接觸，或在安裝產品時防止觀察者的眼睛在危險距離內暴露於光照之下。
- C—非進入區。非進入區的水平間隙至少須達 2.5 公尺。
- D—與危險區域的垂直距離。危險區域與地面相距不得低於 3.0 公尺。
- E—投影機頂視圖。
- F—投影機側視圖。

## License agreement of each software

### GNU GENERAL PUBLIC LICENSE Version 2, June 1991

Copyright © 1989, 1991 Free Software Foundation, Inc.

51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software,

and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

#### GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language.

(Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the

## Supplement - License agreement of each software (continued)

Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues),

conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all.

For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program. If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE

## Supplement - License agreement of each software (continued)

DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT

HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>

Copyright © <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston,

MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode: Gnomovision version 69, Copyright © year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989  
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

## GNU LESSER GENERAL PUBLIC LICENSE Version 2.1, February 1999

Copyright © 1991, 1999 Free Software Foundation, Inc. 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The

ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing nonfree programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in nonfree programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

### GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law; that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code

## Supplement - License agreement of each software (continued)

means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful. (For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General

Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machinereadable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also,

## Supplement - License agreement of each software (continued)

you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software

## Supplement - License agreement of each software (continued)

which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

### NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

### END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting

redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>

Copyright © <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names: Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.
