

Quick Start Guide

Getting Started with Android:

The Dukane model ITP65A display comes with a built-in Android computer. The Android computer allows you to browse the Internet, view or play media (images, videos, audio) from a USB flash drive or SD memory card and perform simple digital annotation. There is also a calculator and a clock with stopwatch capability.

1. The monitor should be installed by an audio visual professional, in an upright landscape position with all safety measures considered.
2. Connect the AC power cord to the AC input on the back of the monitor and connect the other end to an AC outlet.
3. Toggle the power switch in the back of the monitor to the ON position and press the Power button on the front of the monitor or on the remote control.
4. The Android OS home screen will appear with 5 home screen icons. Please familiarize yourself with these icons.

TIP: As you navigate the Android OS you can access the Navigation menu by swiping up from the bottom of the screen.

Browse the Internet:

1. For a wired network connection connect your network cable from your wall or router to the RJ45 input on the bottom input panel on the back of the monitor.
2. For a wireless connection attach the included Wi-Fi antenna to the terminal located on the side input panel on the back of the monitor.
3. Connect to your wireless network by accessing the Android Settings and choosing Network. Turn Wi-Fi on, Choose a network and type the password if necessary.
4. Access the Browser from the home screen icon or within the Apps screen.

View or Play Media:

1. Insert your USB flash drive or SD memory card into the appropriate ports on the side input panel on the back of the monitor.
2. Access your multimedia files from the Apps screen by opening the ES File Explorer.
3. Navigate to your multimedia files, select a file and choose player.

Simple Digital Annotation:

1. Access simple digital annotation from the Navigation Menu or the Apps screen by opening Paint.

Please Note: The Paint app is designed for simple annotations. If you require a more capable annotation software please connect your PC or Mac and install the IPBoard software that is included with the ITP65A.
